

## NEW WEBSITE CHANGES

### YOU SPOKE AND WE LISTENED!!

Hello, NASP members and newsletter subscribers. After several months of hard work, we have now launched our new website that includes major changes such as the method in which our certifications will be attained, as well as the content of the courses. One of the biggest differences is now you can choose which electives you select when taking our professional courses - thereby allowing you to concentrate your certification in a certain area of expertise.

We are extremely excited about these changes, not to mention some of our new online certification courses, including HAZWOPER related courses and updates to HAZCOM and reporting requirements. You may also be pleased with the fact that ALL of our Technician Courses are now less expensive and would be excellent training credentials for others in your organization. Additional group discounts may apply. And finally, we have included additional trainer resources for those of you who are already providing NASP certifications in house. Click [here](#) for details. We would love for you to spend some time checking out the [new site](#). Your feedback will be much appreciated!
